Fluoride ‘whistleblower’ gets job back, $50,000

U.S. Secretary of Labor criticizes EPA for acting improperly

By Mark Lowey

Two years after being fired, a U.S. Environmental Protection Agency scientist who warned of fluoride's health risks got back his job and $50,000 in damages.

The move, announced by the agency’s director, follows a federal judge’s decision to reverse his firing. It also sets a precedent for similar cases.
